Model 4992 CC

**Model 4993 PEX/CPVC**

Model 9993 CC  
with handshower

**Model 9993 PEX/CPVC**  
with handshower

## Installation in as little as 10 minutes!

- No cut adjustable spout shank makes it easier & quicker to install in decks from 3/16" up to 4 1/4" thick.
- Quick connect flexible hose with 24" centers (4993/9993).
- Dead stop for top mounting nuts. Eliminates the guess-work in the amount of valve height above the deck.
- Stainless steel keyed mounting washers with integral teeth -- locks each valve independently to deck.
- Large plastic mounting nuts -- easier and quicker to install.
- Dedicated hot & cold valves -- don't have to change cold side.
- Uses #1248 cartridge.
- Common handle adapters -- don't have to change adapters to match trim.
- Test plug included -- pressure test installation.
- M-Pact compatible -- fits all Moen & ShowHouse trim.
- Wirsbo PEX transition fittings available (#140715).
- Additional CPVC adapters are available for those installations beyond the reach of the flexible hoses, where the entire installation can be piped CPVC (valves to spout). Service kit #140714 includes 4 CPVC adapters and 4 clips. One kit will work for both the 3 hole (4993) & 4 hole (9993) roman tubs.
